

Step 1: Created a text file and saved the file with 1 student details

Step 2: Created a project in visual studio to write the program to read data stored in the text file

Step 3: Check the output

Step 4: Added one more student detail into the text file

Step 5: Check the output

Step 6: Created a git repository

Step 7: pushed the program code into the git repository using push command

Step 8: copy link and update the excel sheet
